-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of group I in the reply filed on 5/12/08 is acknowledged.
2. Claims 3-13 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on 5/12/08.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claims 1 and 2 are rejected under 35 U.S.C. 102(b) as being anticipated by German patent '519.
5. German patent '519 discloses a stapling apparatus comprising a feeding roller driven through various elements by a motor and having a plurality of feeding teeth "d" thereon for engagement between staple "a" of a rolled staple coil.
6. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Udagawa et al. '529.
7. Udagawa et al. '529 discloses a stapling apparatus comprising a feeding roller 43 driven by suitable drive mechanism; i.e. a "motor" (note: column 4, lines 60-65) for advancing a straight staple of a coil of staples (note: Fig. 9) to a stapling location.

Claim Rejections - 35 USC § 103

8. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

9. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

10. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Udagawa et al. '529 in view of German patent '519 or Hoshi et al. '334.

11. Udagawa et al. '529 lacks the feed roller having feed teeth. German patent '519, as set forth above, discloses a feeding roller comprising teeth "d". Hoshi et al. '334 discloses a feeding roller 50 comprising a plurality of teeth thereon (note: Fig. 10). In view of the teachings of German patent '519 or Hoshi et al. '334, it would have been obvious to one skilled in the art to provide the periphery of the feeding roller of the stapler of Udagawa et al. '529 with a plurality of teeth in order to more effectively register and retain the staple coil during operation.

Conclusion

12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. See the attached PTO-892 for related art.
